

SLICwave™ Product News

v5.1 Now Available

It's here!

Integrated Support Systems, Inc. (ISS) is pleased to announce the release of the SLICwave software. With the release of v5.1, ISS has made further improvements to the user interface and expanded the web/browser-based accessibility features first introduced in SLICwave v5.0.

New in SLICwave v5.1

- Redesigned SLICweb™-Vista browser interface with extensive comparison capabilities
- New and innovative capability allows you to easily load information that will appear to users in dialog box based on a pre defined event trigger – providing a powerful capability to set up your own training templates, data entry flows, and quality control procedures.
- More flexible batch processing provides options for managing input/output files. You can:
 - Direct batch outputs results to your local machine,
 - Publish batch results (from multiple directories) to different subdirectories
 - Load LSA036 data (80-column format) into SLICwave.
- Improved retrieval time for Data Navigation and Listview retrieval
- Added capability to change predefined labels for fields, screens, tabs, and buttons

- Enhanced reporting features with corrections and enhancements to the reporting system (i.e., LSA009, LSA019, LSA024, LSA036, LSA151, and LSA152)
- Simplified Export/Import dialog with support for Microsoft Excel®
- Upgraded support for network configuration and security improvements to include improved certificate management functionality
- Upgraded operating system and database management system support

About SLICwave™

SLICwave is the through-life supportability analysis software from ISS. SLICwave features cutting-edge capabilities in an extremely flexible, easy-to-use interface. SLICwave's user interface, developed in Java and XML, provides a consistent, functional, and powerful graphical user interface that simplifies and vastly improves the user experience.

About ISS

Integrated Support Systems, Inc. is committed to providing the most effective software, training, and services solutions for product supportability, product lifecycle management (PLM),

configuration management (CM), and product collaboration – with particular focus on the aerospace and defense industries.

ISS and our strategic partners provide solutions to over 700 customers in 15 countries around the world. We are headquartered in South Carolina with European offices located near Paris, France.
